

TECHNICAL EXPERIENCE

Klaviyo Jun 2024 — Present
Back-end Software Engineer / Events Pipeline Hybrid, Boston, MA

- Enhanced a distributed events pipeline handling 5B+ events daily (50K QPS), improving P99 latency by 7% for hundreds of thousands of customers
- Directed migration of a critical Kafka cluster to a dedicated team, coordinating documentation, scripts, and training to enable independent ownership, boost stability, and reduce Kafka-related incidents by 40%
- Optimized a high-throughput pipeline component with asynchronous Python, Redis, and DynamoDB, using batched requests to improve scalability and cut infrastructure costs
- Developed Airflow/EMR tooling to identify and backfill missing downstream events, reducing engineer recovery time and preventing customer-facing data inconsistencies

Kyruus Dec 2022 — Feb 2023
Senior Full-stack Software Engineer / API Remote

- Delivered the API for our next-generation platform, enabling customer integrations with provider data

Senior Back-end Software Engineer / Pipeline Operations Dec 2020 — Dec 2022
Remote

- Created tools to automate the customer onboarding process, reducing engineering costs and accelerating delivery time
- Architected and implemented a Jenkins Pipeline-based system to replace a head-of-line blocking Jenkins job workflow, improving pipeline reliability, concurrency, and retryability
- Reduced load on internal and external APIs by 50% by eliminating redundant data retrieval steps in the pipeline process

Back-end Software Engineer / Customer Onboarding Mar 2019 — Dec 2020
Boston, MA

- Worked closely with new customers to onboard their providers onto our pipeline
- Standardized customer data, reducing nightly pipeline failures by 20%

PrimePay Jan 2018 — Mar 2019
Back-end Software Engineer / Tax Filing West Chester, PA

- Refactored a legacy tax filing engine to manage and file payroll taxes for tens of thousands of clients
- Designed data visualization and data conversion tools for state and federal tax forms and files (PDF, TXT, XML)

SKILLS

Languages	Python SQL NoSQL Javascript Bash C#
Frameworks & Libraries	Pydantic FastAPI Django Leaflet LINQ
Platforms	AWS (EC2, RDS, EMR) PostgreSQL MySQL MongoDB
Tools	Git JIRA Kafka Redis Docker Kubernetes Terraform Airflow Jenkins \LaTeX
Concepts & Practices	REST API RPC event-driven architecture object-oriented design test-driven development

PROJECTS

Arcavios — Building a collection of tools for managing Magic: the Gathering data	Jun 2023 - Present
Streamlabs Chatbot — Built a plugin to support automatic handling of picture-in-picture replays during livestreams	Spring 2022
G-Player Visualization Tool — Research Assistant for Dr. Alessandro Canossa	2015 — 2016
Cell Phone Intervention Trial for You (CITY) — Research Assistant for Dr. Stephen Intille	Summer 2013

EDUCATION

Bachelor of Science in Computer Science, Northeastern University

ACTIVITIES AND INTERESTS

Volunteer Fire Lookout	2024
