Alexander Gimmi

Software Engineer

Portfolio: gimmi.work github.com/iambroadband linkedin.com/in/alexgimmi

Always curious, detail-oriented software engineer in search of a position that requires a flexible engineer with an opportunity to learn new technical skills and expand on existing ones. Background in maintenance, operation, design, and implementation of customer data pipelines and their related systems. Experienced with many common best practices for managing imperfect data.

SKILLS

Languages Python, Javascript, HTML, CSS, SQL, C#

Tools Git, AWS (S3, Lambda, EC2, RDS, SecretsManager, Route53, CloudFront, etc.), Jenkins, 蹈EX

Frameworks Chalice, Postgres, Bootstrap, JJB, Hugo, LINQ, Leaflet

TECHNICAL EXPERIENCE

Kyruus Dec 2020 — Now

Software Engineer / Pipeline Operations

Fully Remote

Boston, MA

- Designed a streamlined system to replace the existing data pipeline
- Optimized the existing pipeline to reduce load on internal and external APIs by over 50
- Standardized incoming customer data and drastically reduced unexpected outages as a result
- Simplified the implementation process for new customers on the provider data pipeline

Mar 2019 — Dec 2020

Software Engineer / Customer Onboarding

- Coordinated with customer support to promptly deliver customer requested features
- Successfully onboarded new customers in concert with solution architects
- · Monitored the provider data pipeline during an on-call rotation and handled system instability as needed

PrimePay Jan 2018 — Mar 2019

Software Engineer / Tax Filing

West Chester, PA

- Contributed to the ongoing development of an automated tax filing engine to manage and file payroll taxes for tens of thousands
 of clients
- Designed and constructed data visualization and data conversion tools for state and federal tax forms (.pdf) and files (.txt, .xml)
- Engaged the business in the discussion and direction of the initial version of the updated platform

Northeastern University College of Arts, Media, and Design

Jan 2015 — May 2016

Research Assistant / G-Player Visualization Tool

Boston, MA

- Created a data-agnostic visualization tool to compare participants' spatiotemporal data and analyze their in-game decisions via data-playback and statistical models
- Expanded the tool for an open-source DARPA grant by restructuring the upload workflow to allow for varied file formats and structures (.csv, .json, .txt, .xml)

Northeastern University College of Computer and Information Sciences

Jul 2013 — Dec 2013

Research Assistant / Cell Phone Intervention Trial for You (CITY)

Boston, MA

- Studied the effectiveness of mobile (Android, iOS) health applications by contributing to an ongoing, large-scale trial for overweight participants
- Constructed an internal auditing tool to measure participant engagement and retention
- Implemented context sensitive user feedback based on data collected from a collection of wearable and mobile phone sensors
- Represented Dr. Intille's team for a conference at Google Zurich regarding health-related research using Google Glass (Mirror API)

EDUCATION

Bachelor of Science in Computer Science, Northeastern University

2016
